Publication Title:

CONVERTIBLE

Abstract:

Abstract of WO2005095134

Disclosed is a convertible (1) comprising at least one forward roof section (6) that is provided with a flexible cover (7), forward being relative to the direction of travel, and a rigid rear roof section (4) which encompasses a rear window (5). Said convertible (1) is configured such that the forward roof section (6) comprises several lateral frame parts (8, 9, 10) that are located one behind another, can be collapsed towards each other about at least substantially horizontal pins (43, 44, 39, 40), and can be covered by the rear roof section (4) in the lowered position.
